## Training

### GeeksforGeeks

#### DSA Training with C++ and Java

- **Data Structures:** Mastered core data structures such as arrays, linked lists, stacks, queues, hashmaps, heaps, and trees.
- Developed a comprehensive understanding of key algorithms, including sorting methods and searching techniques; applied this knowledge to optimize code execution speed, resulting in improved performance for applications handling up to 10 million data entries.
- Studied and applied recursion and backtracking techniques to solve complex computational problems efficiently.
- Analyzed and optimized algorithms using Big-O notation to improve time and space efficiency.
